This user's manual describes functions of Cnet I/F module.
Please read this manual carefully to understand the functions thoroughly prior to system design.

Revision record

Revision record	Date of issue revised	Contents revised
1st edition		1st print
1st revision	2000.01.10	- GM7 Cnet I/F module added - Functions of frame editor Version 2.0 added

◉ Contents ◉

Chapter 1 Introduction ····· 1-1~1-7

1.1 Module selection per CPU type ····· 1-2

1.2 Functions of Version 2.0 ····· 1-3

1.2.1 Version check ····· 1-3

1.2.2 Added functions introduction of Version 2.0 ····· 1-6

1.2.3 Established functions ····· 1-7

1.2.4 Frame editor Version 2.0 ····· 1-7

1.2.5 Added function of Version 2.0 ····· 1-7

Chapter 2 Definition of terms ····· 2-1~2-6

Chapter 3 Product specification ····· 3-1~3-12

3.1 General specification ····· 3-1

3.2 Performance specifications ····· 3-2

3.3 Cable specifications ····· 3-4

3.4 Terminating resistance ····· 3-5

3.5 Structure ····· 3-7

3.5.1 Part names of G3L-CUEA ····· 3-7

3.5.2 Part names of G4L-CUEA ····· 3-8

3.5.3 Part names of G6L-CUEB ····· 3-9

3.5.4 Part names of G6L-CUEC ····· 3-10

3.5.5 Part names of G7L-CUEB ····· 3-11

3.5.6 Part names of G7L-CUEC ····· 3-12

Chapter 4 Performance specification ····· 4-1~4-33

4.1 Operating mode setting ····· 4-1

4.1.1 Channel operation in interlocking mode ····· 4-3

4.1.2 Channel operation in stand-alone mode ····· 4-4

4.1.3 Channel operation in self diagnosis mode (Loop Back) ····· 4-5

4.2 Method of serial interface ····· 4-6

4.2.1 RS-232C interface ····· 4-6

4.2.2 RS-422 interface ····· 4-9

4.3 How to set transmission specifications ····· 4-11
4.3.1 Setting items ····· 4-11
4.3.2 How to set ····· 4-12
4.3.3 Reading setting values ····· 4-16
4.3.4 Transmission specification setting of Gm7 series ····· 4-17
4.4 How to connect to modem ····· 4-19
4.4.1 Connection to dedicated modem (RS-232C) ····· 4-20
4.4.2 Connection to dial-up modem (RS-232C) ····· 4-27

Chapter 5 Frame Editor ····· 5-1~5-43
5.1 Basic functions ····· 5-1
5.2 Screen configuration and menu ····· 5-2
5.2.1 Basic parameter setting ····· 5-6
5.2.2 Frame setting ····· 5-7
5.2.3 Frame writing/reading ····· 5-23
5.2.4 Monitor function ····· 5-27
5.3 Managing function of flash memory ····· 5-31
5.3.1 Writing of flash memory ····· 5-31
5.3.2 Reading of flash memory ····· 5-34
5.4 Changing of online mode ····· 5-35
5.4.1 Changing of local operating mode ····· 5-35
5.4.2 Changing of remote operating mode ····· 5-39

Chapter 6 System configuration ····· 6-1~6-11
6.1 System configuration available ····· 6-1
6.1.1 1:1 connection (no modem) to PC ····· 6-1
6.1.2 1:1 dedicated modem connection to PC ····· 6-2
6.1.3 Modem connection to PC & communication between Cnet I/F modules ····· 6-3
6.1.4 Communication between PC and Cnet using interlocking channel ····· 6-4
6.1.5 Interlocking & stand-alone channel communication ····· 6-5
6.1.6 Dedicated communication to PC & other company's RS-422 communication ····· 6-6
6.1.7 Optical modem communication for mobile communication ····· 6-7
6.1.8 Wireless modem communication between revolution bodies ····· 6-8
6.1.9 TM/TC communication system ····· 6-9

6.2 System configuration unavailable ····· 6-10
6.2.1 Dial-up modem communication between Cnet I/F modules ····· 6-10
6.2.2 GMWIN connection using RS-422 channel of Cnet I/F module ····· 6-11

Chapter 7 Communication program ····· 7-1~7-132
7.1 User defined communication ····· 7-1
7.1.1 Introduction ····· 7-1
7.1.2 User defined operation ····· 7-2
7.1.3 User defined Function Block (SND_MSG ,RCV_MSG) ····· 7-5
7.1.4 Example of user defined programming ····· 7-12
7.1.5 User defined communication for Gm7 series ····· 7-25
7.2 Dedicated communication slave ····· 7-34
7.2.1 Introduction ····· 7-34
7.2.2 Frame structure ····· 7-35
7.2.3 List of commands ····· 7-38
7.2.4 Data type ····· 7-40
7.2.5 Execution of commands (Ex.) ····· ····· 7-42
7.3 Dedicated communication master (communication between Cnets) ····· 7-94
7.3.1 Introduction ····· 7-94
7.3.2 Function Block for dedicated communication ····· 7-95
7.3.3 How to use dedicated Function Block ····· 7-97
7.3.4 Dedicated communication master for G7L-CUEC ····· 7-102
7.4 Other company's dedicated mode ····· 7-109
7.4.1 Introduction ····· 7-109
7.4.2 Operating mode & downloading of communication driver ····· 7-110
7.4.3 Specifications of A. B communication driver ····· 7-114
7.4.4 Specifications of MODBUS communication driver ····· 7-119
7.5 GMWIN remote connection ····· 7-122
7.5.1 Introduction ····· 7-122
7.5.2 GMWIN remote connection ····· 7-122
7.5.3 Remote connection between Cnet I/F modules ····· 7-129

Chapter 8 Exercising program ····· 8-1~8-66
8.1 TM (Tele Metering) system using dedicated modem ····· 8-1
8.1.1 Exercising program ····· 8-2

8.2 Communication system between Cnet I/F modules using optical modem ····· 8-8
8.2.1 Exercising program ····· 8-9
8.3 GMWIN connection using dial-up modem ····· 8-21
8.3.1 Exercising program ····· 8-21
8.4 Communication with GOLDSEC MJUC24 ····· 8-25
8.4.1 Exercising program ····· 8-25
8.5 Communication with MASTER-K 1000H ····· 8-30
8.5.1 Exercising program ····· 8-30
8.6 Communication with HEX communication equipment ····· 8-36
8.6.1 Exercising program ····· 8-36
8.7 Example of using G7L-CUEC ····· 8-45
8.7.1 Dedicated communication master ····· 8-45
8.7.2 User's definition ····· 8-53

Chapter 9 Diagnosis function ····· 9-1~9-6
9.1 Loop-Back self diagnosis ····· 9-1
9.1.1 Principle of operation ····· 9-1
9.1.2 Procedure of Loop-Back self diagnosis ····· 9-2
9.1.3 Operation of Loop-Back test LED ····· 9-3
9.2 Diagnosis during power on ····· 9 -6

Chapter 10 Installation and Testing operation ····· 10-1~10-9
10.1 Installation and testing operation ····· 10-1
10.1.1 Mounting and installation ····· 10-2
10.1.2 Cautions during system installation ····· 10-4
10.1.3 Testing operation ····· 10-6
10.2 Maintenance and Check ····· 10-8
10.2.1 Daily check ····· 10-8
10.2.2 Regular check ····· 10-9

Chapter 11 Troubleshooting ····· 11-1~11-11
11.1 Abnormal operations ····· 11-1
11.2 Troubleshooting by each error code ····· 11-3
11.2.1 Error code ERR-1, ERR-2 : hardware & system error ····· 11-3

11.2.2 Error code ERR-3 : communication command error ····· 11-5
11.2.3 Error code ERR-4, ERR-5 : Receive monitor data error ····· 11-7
11.2.4 Error code ERR-6, ERR-7 : Transmission monitor data error ····· 11-8
11.2.5 Error code ERR-8, ERR-9 : Error on dedicated communication ····· 11-9
11.2.6 Error code ERR-10 : error on GMWIN connection ····· 11-11

Appendix ····· A-1~A-15
A.1 LED indication specification····· A-1
A.1.1 Applicable type ····· A-1
A.1.2 LED indication specification during normal operation····· A-1
A.1.3 LED indication specification during abnormal operation ····· A-5
A.1.4 LED indication specification during power on ····· A-6
A.2 Error code table ····· A-7
A.2.1 Error code for user defined communication····· A-7
A.2.2 Error code for dedicated slave communication····· A-9
A.2.3 Error code for dedicated master communication ····· A-11
A.3 Dimensions of appearance····· A-12
